

Discount and Sale Price Cheat Sheet

Work out discount amounts, final prices and whether a sale is actually worth it.

Discount formula

Discount amount = original price x discount percentage. Final price = original price - discount amount. For multi-buy deals, compare the final unit price too.

Sale check table

Item	Original price	Discount	Final price	Unit price / note

Before buying

Question	Answer
Would you buy it without the sale?	
Is the unit price actually better?	
Is there a better bundle or pack size?	
Does return policy matter?
