

Unit Price Shopping Worksheet

Compare products by price per standard unit before choosing the cheapest-looking pack.

How to use it

Write the product, total price, quantity and standard unit. Calculate the unit price, then add a practical note such as quality, freshness, storage risk or whether the larger pack will actually be used.

Comparison table

Product	Total price	Quantity	Unit price	Better value?	Notes
Example oats	\$4.80	750 g	\$0.64 / 100 g	Maybe	Check special label

Decision prompts

Check	Answer
Is the bigger pack cheaper per standard unit?	
Will you use it before it expires?	
Is the sale price still cheaper per unit?	
Are the products the same quality and size?
